ARPIT AGARWAL

Full Stack Engineer → Technical Account Manager | Building AI-Driven Sales Tools

arpit.agarwal67@gmail.com | linkedin.com/in/arpitagarwal30 | India

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building scalable web applications using React, .NET Core, and TypeScript. Proficient in RESTful APIs, microservices, and cloud platforms (AWS, Azure), with a strong focus on clean architecture, SOLID principles, design patterns, and maintainable codebases. Experienced in leveraging AI-assisted development tools, including Claude Cowork, Claude Code, and GitHub Copilot, to accelerate delivery, improve code quality, and streamline debugging. Proven track record in SQL/NoSQL databases, automated testing, Docker, Agile workflows, and CI/CD pipelines, consistently delivering user-focused, production-grade solutions.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering
Dr. A.P.J. Abdul Kalam Technical University 08/2017 – 08/2021

EXPERIENCE

Technical Account Manager *Remote*
Cadient Talent 06/2026 – Present

Cadient Talent is a Basis Vectors Capital portfolio company.

- Architecting and building the internal Command Center application using React, TypeScript, and RESTful APIs, with AI-integrated features to streamline how the Sales and BDR teams source prospects and leads.
- Partnering directly with customers to understand pain points, troubleshoot issues, and deliver tailored solutions — strengthening adoption and satisfaction across accounts.
- Leveraging AI tooling (Claude, GitHub Copilot) throughout the development lifecycle to accelerate delivery and embed AI-assisted workflows directly into the product.

Senior Software Developer *Remote*
Mindfire Solutions Digital LLP 10/2023 – 06/2026

Mindfire has partnered with global companies across every major industry for over two decades, building stellar software products that connect people, technology, and business.

- Architect and deliver full stack solutions using .NET Core, React, and TypeScript, directly contributing to business growth and digital innovation for in-house and client projects.
- Drive performance optimization initiatives including CPU profiling, query tuning, and caching strategies, resulting in measurable improvements in application responsiveness and scalability.
- Write and maintain unit and integration tests to ensure code reliability, catch regressions early, and uphold quality standards across full stack deliverables.
- Leverage Claude Cowork for collaborative problem-solving and debugging, reducing resolution time on complex issues, and use Claude Code and GitHub Copilot to accelerate development cycles and maintain high code quality.
- Apply user behavior insights and product thinking to inform feature design decisions, translating end-user needs into impactful technical improvements.
- Lead code reviews, mentor junior developers, and champion continuous learning and engineering best practices across the team.

Software Developer *Noida*
Dish TV India Limited 09/2021 – 09/2023

Asia's largest Direct to Home Entertainment Company, pioneering digital entertainment experiences.

- Spearheaded end-to-end software development initiatives, enhancing digital entertainment platforms and improving reliability for millions of subscribers.
- Collaborated with cross-functional teams to design and deploy scalable applications aligned with strategic business objectives.

- Conducted thorough code reviews and enforced coding standards, consistently raising the bar for software quality and maintainability.

Virtual Internship (SDE) *Remote*
JPMorgan Chase & Co. 05/2020

J.P. Morgan is a global leader in investment banking, commercial banking, financial transaction processing, and asset management.

- Contributed to real-time front-end problem-solving, enhancing UI functionality on industry-leading financial platforms.
- Gained hands-on exposure to enterprise-grade development practices and financial software standards.

SKILLS

Languages & Frameworks: .NET Core, C#, React.js, JavaScript / TypeScript, Entity Framework

Engineering Practices: Clean Architecture, SOLID Principles, Design Patterns, Unit & Integration Testing

Databases: MS SQL Server, NoSQL

Cloud & DevOps: AWS, Azure, Docker, Git, GitHub, CI/CD, Agile Development

AI & Developer Tools: Claude Cowork (collaborative debugging & problem-solving), Claude Code, GitHub Copilot

Product & Marketing: Product Thinking, User Behavior Understanding, Digital Marketing Fundamentals

CERTIFICATIONS

- Claude Certified Architect – Foundations – Anthropic
- AWS Partner: Technical Accredited – Amazon Web Services
- Microsoft AI-900: Azure AI Fundamentals – Microsoft Certified
- AI and Machine Learning Workshop – Certified by Delhi Technical University and Microsoft WAC
- Cyber Security Workshop – Certified by UP Police and Cyber Security Cell India

LANGUAGES

English: Full Professional Proficiency

Hindi: Native or Bilingual Proficiency
